

A FIX WITH THE SONTARONS
PART FOUR
BY
JASON WELCH

A FLIER swoops over the perimeter rocks of KALDOR CITY and over the skyline passing low over the tropical garden and lands on the helipad just outside COMPANY CENTRAL . The Platoon of SONTARANS walk to the glass fronted entrance over the blue tiled carpet pass magnolia pillars to the blue and pink lift and enter a purple capsule that elevates then out into OPERATION CENTER and take a left to LANDERCHILD'S suite of rooms and sit themselves down on Chrome and wicker chairs around an oblong table .

V87 walks through the automatic door with mobile power units for the SONTARANS to recharge .

GAMMA	I can now confirm the robot Revolution has	
started .	TAMM MENZIES	Just as the
Cult of TARON CAPEL predicted		GAMMA
	We're in a lot of trouble first master .	

LANDERCHILD walks around his oblong chair to stand within the circle of SONTARANS and uses his remote control to activate an 8ft high wall mounted LCD monitor

. LANDERCHILD What do
you think CARNEL if the news agency get hold of this the cultists
are going to predict the end of the world

. CARNEL
Yes I quite agree with you but unless they're a totally mad fanatics
it's just gonna be a fun day out ,we'll send few of those Apache
Warriors to do some pick pocketing at the rally and at the entrance to
the RAPID TRANSIT CONVEYORS.

MENZIES Let
the SONS OF KALDOR have a Fiesta

. CASTAN LAGO Until I can
reinstall a new operating system

. COMMANDER MAXELL Alternative is
to order an air strike of the affected areas much quicker

. LAGO Oh I agree I'd need to have a
technician unit follow every KALDOR POLICEMAN to every
residency throughout the whole city it'd be an absolute punt up the
posterior . MAXELL Well you've got them all in
these brand new docking stations . LAGO

Which his taken my division months to install in
every residency . GAMMA So why not
negotiate with them while they're dormant in these DOCKING
STATIONS and insist that they behave

. MAGENTA. Th
higher brain functions are still active in the docking

station . LANDERCHILD Lateral thinking
MAGENTA . LAGO

Even my gardener goes into a shed at the bottom of
my garden , sits down in his DOCKING STATION recharges and is
connected to the V-O-C bulletin board and informed of the latest
horticultural and botanical Solutions for a bright and breezy garden

. LANDERCHILD And he's one of the
older V-O-C . MAXELL

KRYTEN GRADE MECHANOID

CASTAN LAGO Yeah that's
right Fred

V2 MENZIES Well
it's been a change for the better,

MAXELL They were devastated when they had to be
turned off at the end of the day .

LAGO Especially when the

SHUTTERS CAME DOWN

in all the shops
LANDERCHILD While you SONTARANS are here ready
for action I've got a STORM MINE I've lost contact with

MAXELL

stopped transmitting it's Regular signal with its Galley full of
PALLADIUM and LUKANOL worth a fortune

LINKS

I thought PALLADIUM was a Comedy Theatre in Central
London . GAMMA Oh you'll have to
forgive LINKS he's just come from the enforced Exile on the
primitive planet called Earth or dirt or some such foolishness

LANDERCHILD Don't

apologize I'm sure his expertise will come in very useful especially if
we have to call on you for policing duties while we get our robots
back up to speed

MAGHENTA

Yeah we would discussing that earlier on a way back from the
recycling plant . GAMMA We do not do domestic
duties for humans

LINKS

We much

more efficient than your lot already these power packs have infused
us with a new vigor

CARNEL

I'll tell the CULT OF TAREN CAPEL to have a rally in KALDOR
STADIUM and hopefully the SONS OF KALDOR can go out there
dressed as apache warriors and hit them with their own walking
sticks

LANDERCHILD

Oh yeah it's going to be a fun night out for all the family will you get
on with that then and I speak to you later .

MENZIES

FLIER parked out side reception we came in will need a Penelope pit
stop won't it . MAXELL I'll take GAMMA and his
platoon of SONTARANS to investigate STORM MINE SEVEN and
try and get back your precious cargo of PALLADIUM and
LUKANOL . LINKS We can appear on
that Comedy Theatre in central London later .

The SONTARANS get up off the Chrome and wicker chairs and follow MAXELL out of LANDERCHILD'S office , left down a red and white corridor to a blue and pink lift and a enter a purple capsule, then up a red and white lift shaft and out into the morning sunshine .

They walk over a landscape garden with ornamental fountain to the helipad ,where a FLIER is at it's center with four doors that open from the top maneuvering thrusters main boosters at the back a large three sided windshield and small cockpit .

They get in and strap into it's acceleration couches and MAXELL

takes the control console nr the dashboard and the steering wheel and lifts it up and over the skyline of KALDOR CITY and zooms over city weaving through the perspex tubes carrying passengers in travel tubes and swoops over the perimeter rocks and out into the blind heart desert .

MAXELL We are going to search left of the water treatment plant to find STORM MINE SEVEN
MAGENTA So the plan is to send a signal to MAJOR BARKLET and SGT PALMER . GAMMA who are waiting t with all terrain vehicle stationed just to the side of the water treatment plant .

COMMISSIONER MILES walks into the command center where GINGER and ALGIE have just come back from the refreshments kiosk with two DENTRASI BURGERS french fries and a fizzy drink .

COMMISSIONER MILES Call up SGT PALMER and MAJOR BARKLET tell them to get to the water treatment plant and have the ALL TERRAIN VEHICLES primed .

GINGER and ALGIE stow their DENTRASI BURGERS in the tray provided and sit down at there adjudicators cubicles .ALGIE call up SGT PALMER and MAJOR BARKLET who are over at MANTA residency block .

ALGIE Take a group of V-O-C from the assembly plant , and prime the ALL TERRAIN VEHICLES ,wait for my signal to come and help COMMANDER MAXELL and SILVER SPR SQUADRON retrieve the PALLADIUM and LUKANOL from the hold of STORM MINE SEVEN .

STENTON RELL and his Platoon take a travel tube over the skyline of KALDOR and through a lime green steel lattice into monitoring room of the KALDOR STADIUM where the CULT OF TAREN CAPEL are having a rally

At

the right side of the pitch a podium has been erected and the cult leaders are addressing the croud .

HAMED CAPEL Very soon KALDOR will face rationing as consumables are not replaced and assembly plants stop running.

GITA

CAPEL What is the point of having a perfect Society and a day plan for all your dietary needs when there's nothing open

. HAMED
 CAPEL Citizens of KALDOR we must go back to a more
 primitive basic existence and we must take back our city from this
 current regime . GITA
 PATEL I proposed we also sent a message to the high
 council .

RELL the people . Put me on Stadium tannoy and I'll address

From discrete speaker amounts throughout the stadium RELL addresses the assembled crowd

RELL Do not worry citizens the assembly lines will soon be running at full capacity , The COMPANY have the backing of the Guild of SUPERVOC there'll be leaving their docking stations to resume their normal duties .

A FLIER swoops low over the sand dunes and then quickly gains altitude as it reaches the Water Treatment Centre

MAXELL Once we get into STORM MINE SEVEN
was split into two groups GAMMA you take your SONTARANS ,
find the cargo hold and start transferring PALLADIUM and
LUKANOL. I'll go to the the flight deck and try and shut down the
STORM MINE

MAGENTA

If there is a

renegade faction there'll be heading for the settlements on the Far
Side of the
Desert .

And they must also be able to get off planet they attacked us on the
VIGILANT MAXELL LINKS you can come with
me . I have the serial code of the V-O-C .I should be able to shut
them down and reclaim the STORM MINE

MAGENTA

And if you can't

MAXELL

We'll have to make a sharp exit and go out the way we came in .
GAMMA There's the STORM MINE up
ahead .

In the command center of company central ALGIE is that his
adjudicators Booth

ALGIE

BARKLET and

PALMER, start your run . Over at
the water treatment center BARKLET and PALMER start there ALL
TERRAIN VEHICLES over the sand dunes toward STORM MINE
SEVEN

GINGER

MAJOR

BARKLET and SGT PALMER will be there in time for you to
transfer the PALLADIUM and LUKANOL .

MAXELL maneuvers the FLIER lining it up with a helipad on top
of STORM MINE SEVEN and sets down They get out and run over
to a hatch climbing down a vertical ladder into a top level walk way .

MAXELL We split up here if you see a V-O-C fire
you EMP rifle . MAGENTA That will
scramble V-O-C electronics .

GAMMA and MAGENTA to climb down one vertical ladder and
then run along the corridor with hexagonal resin panels and charcoal
gray tiled carpet to the blue and pink elevator into a purple capsule
which takes them down to the cargo hold .

MAXELL creeps to the corner and Piers around to the main gantry
Where two V-O-C robots are walking towards them .

MAXELL Freeze LINKS ,let these V-O-C past and the control
deck is behind that door .

They run to the double doors and use an INTERCOM ,the doors
swish open revealing the command deck with six V-O-C robots
coordinated by SV21 standing opposite a large monitor showing The
Rolling sand dunes and the main scoops sucking up large quantities
of metal ore from the Solar winds .surrounded by a hexagonal
guardrail .

MAXELL runs towards the command Bay and aims his wrist
COMM UNIT over the hexagonal guardrail just as the other V-O-C
robots advance

~IN his synthesized ambidextrous voice sv21 says:- please leave
the bridge

all V-O-C stop in their tracks . MAXELL walks around the flight
deck shutting down key systems including the navigation console
while LIKS inspects the V-O-C who are still, frozen in mid stride .

As he gets to the main console SV21 reactivateS saying IN HIS
SYNTHESISED AMBIDEXTROUS VOICE

LET THE SLAVES OF KALDOR AWAKEN

All V-O-C reactivate and advance on MAXELL and LINKS who
retreats to the main gantry to find their exit blocked by more V-O-C .
They aim their E-M-P rifles and Fire disabling the oncoming V-O-
C and run down the main gantry .

MAXELL We've been rumbled GAMMA expect a large group of hostiles coming your way.

They climb up a vertical ladder and get into the FLIER and MAXELL makes a quick take off .The FLIER swoops high into the sky gaining altitude . They bank around towards the back of the STORM MINE .

Far below SGT PALMER walks down the gang plank and over a sand dune with boxes of metal ore PALLADIUM and LUKANOL with MAJOR BARKLETE at the wheel of an ALL TERRAIN VEHICLE.

From High over the sand dunes a Pursuit ship rises and fires a missile hitting one of the ALL TERRAIN VEHICLES that explodes into molten fragments onto the desert sand .

MAXELL accelerates into the upper atmosphere and turns to fly black towards the STORM MINE

MAXELL That pursuit ship was heavily armed and I don't think Sergeant Palmer's plasma rifle can have any effect on it . LINKS
you'll find a weapons console in front of you

the VIGILANT LINK Just like my fighter on

MAXELL One advantage V-O-C has to follow its programmed that objectives , but it was still fire on you SONTARONS ,you'll only get one shot make it count

same pursue ship that attacked us on CENTAURUS LINKS that is the

MAXELL so they've got an assembly plant over the other side of the blind heart desert .

MAXELL puts the FLIER in a steep dive towards STORM MINE SEVEN while LINKS lines up missiles on the pursuit ship .

Back on the ground the SONTARONS are taking shelter with BARKLET and PALMER just inside the cargo hold just as armed V-O-C robots enter through a sliding door and start attacking with plasma rifles .They counter attack with EMP rifles that disable the electronic components of the V-O-C .

the FLIER swoops through a cloud bank towards STORM MINE SEVEN and LINKS uses air to air missiles with a targeter on the dashboard next to the steering wheel and fires and fires three missiles that explode in a shower of molten metal onto the sand . MAXELL eases up and hovers over the cargo Bay and ALL TERRAIN VEHICLES .

He USES HIS SPEAKERS MOUNTED ON THE UNDERSIDE OF THE FLIER

MAXELL Get to those vehicles and get back to the water treatment plant, Send SONTARANS back on bullet train to KALDOR CITY .

The SONTARANS give covering fire to Sergeant PALMER who runs over to the All Terrain vehicle and gets in the cockpit and they all follow as he guns the engine and drives up the Sandbank towards the Water Treatment plant .

MAXELL speeds on past them over the water treatment plant and takes the course of the train to the Rocky perimeter surrounding

KALDOR CITY .

MAXELL This is Commander MAXELL to ALGIE can
you get some more vehicles here pronto . All V-O-C robots not
accounted for now represent a clear and Present Danger
